

COBIT® 5 Foundation Course Outline

COBIT® 5 is the latest edition of ISACA's globally accepted framework, providing an end-to-end business view of the governance of enterprise IT that reflects the central role of information and technology in creating value for enterprises.

The COBIT® 5 Foundation course is the entry level certification course during which the candidate will learn about the five basic principles on which COBIT® 5 is founded and the enablers for governance and management of enterprise IT which support the integration of IT with the enterprise. The course explains the COBIT® framework and supporting materials in a logical and example-driven approach

Course Objectives

- To understand how IT management issues are affecting organizations
- The need for an effective framework to govern and manage enterprise IT
- How COBIT® is used with other standards and best practices
- The functions that COBIT® provides and the benefits of using COBIT®
- How to apply COBIT® in a practical situation

Who should attend?

Business managers, IT management consultants, IT governance professionals, and auditors who wish to gain a better understanding of COBIT® 5 and what the framework can provide their organization
